- cooling
- heating

IPCCR Disaggregated EUI

The CBECS classifies buildings according to their "principal building activity (PBA)" at the time when the survey is completed. The PBA is defined as the primary business, commerce, or function within each building. For projects with multiple activity classifications, the activity that occupies the most floorspace ultimately defines the usage type category. Buildings are also classified into more specific sub-categories of activities, which are reflected in the "National Office Activity Breakdown" chart below.

The CBECS website specifically defines the education PBA as "Buildings used for academic or technical classroom instruction, such as elementary, middle, or high schools, and classroom buildings on college or university campuses. Buildings on education campuses for which the main use is not classroom are included in the category relating to their use. For example, administration buildings are part of "Office," dormitories are "Lodging," and libraries are "Public Assembly."

More information on building activity definitions can be found on the CBECS website located here:
